Collaborated closely with backend teams to build responsive, user-focused applications tailored to diverse business.

## Projects

---

### ERP System for MOM Company => click to see mom ([MOM](#))

- Developed the frontend of a comprehensive ERP system for MOM, a food industry client, at Codestan.
- The system includes robust modules for Product management, Purchases, Sales, Expense tracking, Staff Workload, Inventory Transfers, Returns, Financial Reports, HRM, and Accounting, alongside Settings and User Profile functionalities.
- Collaborated with backend teams to deliver a seamless, user-focused interface, enhancing operational efficiency across departments.

## Inventory & Financial Management System (Traffic Units in Egypt) => click to see ([Link](#))

- Developed the frontend of an integrated system for managing inventory and financial operations across Traffic Units in Egypt, for Merge Company, a safety equipment distributor.
- The system includes modules for Primary Inventory, Traffic Units' Local Inventory, Sales Transactions, Payment Collection, and Reporting on Partner Companies' Revenue Shares.
- Collaborated with backend teams to deliver a user-friendly interface, enabling real-time tracking of stock movements, sales, and financial data across multiple government-affiliated locations.

## Dashboard for offerX APP => click to see offerX ([OfferX](#))

- Developed a feature-rich dashboard for the **OfferX** application, an online platform similar to Talabat, designed for managing a wide range of business functions.
- The dashboard enables seamless management of offers , meals , vendors, users, , deliveries, orders, statistics, and special offers.
- Key technologies include: react , redux , bootstrap , react-toastify , recharts , axios , react-data-table, RefreshToken and API integration.

## Wavex AI – AI-Powered Business Consultation Platform => click to see WavexAI ([WavexAI](#))

- Developed the frontend for Wavex AI, a platform designed to assist businesses in optimizing their operations through AI-driven insights and professional consultations.
- Integrated **OpenAI's ChatGPT** to provide automated business advice, helping users enhance their strategies and decision-making.
- Enabled real-time consultations with company experts, allowing personalized guidance for business growth.
- Collaborated with backend developers to ensure seamless AI interactions and user-friendly experiences.

## Technologies and Languages

---

- **Programming Languages:** JavaScript, TypeScript
- **Frontend Technologies:** HTML, CSS, React, Redux-Toolkit, Next.js, Bootstrap , Figma,
- **Backend Technologies:** Node.js, MongoDB, Express.js, , API Integration , SQL
- **Tools & Other Skills:** Git, GitHub , Postman , Hoppscotch , Swagger , OWASP-Top-10, Linux , CCNA
