I'm a detail-oriented Frontend Software Engineer. I'm a hard-working and dedicated front-end React developer with a keen eye for detail, and I always refer to learning and increasing my understanding and practical skills. I have a passion for self-learning and strive to improve and challenge my skills to become better at what I do.

Technologies and Languages

- Languages: JS,
- Technologies: HTML, CSS , Redux-Toolkit, Git, GitHub, ES6, API, TypeScript, UI with Figma

Skill Highlights

- Project management
- Problem Solver
- Creative design
- Innovative
- Fast Learner
- Strong decision maker

Projects

Production Project

This project is for food company ERP but hasn't been completed yet.
That is a demo link to it [ERP] (backend for most pages wasn't completed)

I made it alone, and from scratch, it consists of more than 200 pages with two languages (EN, AR). It includes main Components like (products, purchase and vendors, sale (included POS), expense, transfer, reports, staff, finance accounting, settings, profile)

My Personal Projects

- Hotels live link [Hotels]
  GitHub code: [project9]

- E-commerce live link [E-commerce]
  GitHub code: [project10]

- YouTube Clone live link: [Youtube]
  GitHub code: [project6]
